BUILT TO PROTECT WHAT MATTERS MOST

PROTECTION IS JOB ONE

From home base to workplace to campsite and back again, Ram 1500 helps get you to your destination with confidence. Over 100 standard and available Safety and Security features work together to help make your drive more secure.

ADVANCED AIR BAG⁵ TECHNOLOGY

The six standard air bags⁵ help provide protection and peace of mind to vehicle occupants. In the event of a front-end collision, the front air bags⁵ feature adaptive venting technology, opening a vent within the air bag⁵ cushion that adapts to the occupant size and severity of the crash.

MASSIVE BRAKES

Front and back, Ram 1500 standard rotors measure up—and they're the largest brakes in their class³: nearly 15 inches in diameter.

SENSORS, CAMERAS AND TECHNOLOGY

Ram 1500 uses a variety of standard and available advanced Safety and Security features to help make every drive secure.

ELECTRONIC PARKING BRAKE

Multifunctional, it features five operational modes, including Safe Mode and Drive-Away Release.

SIDE-IMPACT DOOR BEAMS

The robust beams built into every Ram 1500 help reinforce protection against side impacts.

FRONT FRAME RAIL SECTION

In the event of a frontal offset collision, dynamic front crumple zones with front splayed frame rails and tire blockers help protect against cab intrusion.

ADVANCED TECHNOLOGY ABOVE, BELOW AND BEYOND

Ram 1500 has you covered with available smart ways to tow, change lanes, cruise and park.

BLIND SPOT MONITORING (BSM)[®] WITH REAR CROSS-PATH AND TRAILER DETECTION⁷

This available system scans the blind-spot zones beside and behind the vehicle to help ensure trailer safety during maneuvering while automatically sensing and accounting for the length of the trailer.

LANESENSE[®] LANE DEPARTURE WARNING PLUS[®]

If you begin to drift from your lane, the available LaneSense Lane Departure Warning Plus[®] helps keep you in your lane by warning you visually and adjusting your steering.

SMART CRUISING

Available Adaptive Cruise Control with Stop & Go[®] detects vehicles ahead. If increased braking is needed in slower traffic, the available Forward Collision Warning with Advanced Brake Assist¹⁰ automatically helps adjust to a safe distance.

GUIDED PARKING

Available Parallel and Perpendicular Park Assist¹¹ provides active guidance when parking. The guidance system directs you to engage the gear position, brake and accelerator while it automatically controls steering.

STRENGTH FROM THE INSIDE OUT

A strong foundation is the backbone of true capability. The Ram 1500 frame construction is built to last, with 98 percent of the steel used in the frame comprised of high-strength steel. The result is exceptional durability while still maintaining excellent handling.

REAR-AXLE THERMAL MANAGEMENT SYSTEM

This available technology controls lubricant viscosity—a real contribution to the impressive efficiency.

HIGH-STRENGTH STEEL

The frame takes the concept of durability to extremes. 98 percent of the steel used in the frame is high-strength steel.

FOUR-CORNER AIR SUSPENSION

The available class-exclusive Active-Level™ Four-Corner Air Suspension³ is ideal for towing, maintaining an even and level profile when loaded.

CLASS IV HITCH RECEIVER

Trailer is part of Ram DNA. The available Class IV hitch receiver helps make it happen.

PROGRESSIVE-RATE REAR SPRINGS

They automatically adapt to payload while helping maintain a level profile and superb ride quality.

MASSIVE BRAKES

At nearly 15 inches in diameter, the front and rear rotors are the largest in the class.³

SMART FRONT AND REAR SUSPENSIONS

What works: a heavy-duty front stabilizer bar and class-exclusive standard link coil rear suspension.³

SMART SHOCKS

Frequency Response Damping (FRD) shock absorbers adapt to varying surfaces and driver demand.

GO THE DISTANCE

New available TRSC enables a driver to intuitively and precisely Reverse steer a trailer via camera vision. Unlike other systems, ours is self-calibrating and does not require the use of trailer-mounted positioning stickers and related calibration maneuvers.
