SYNC® 4: CONNECTING. FASTER AND EASIER.

Today, being connected means you don't have to miss out on that project bid. You find the subcontractors you need, you can navigate around traffic to deliver on time, and receive a text reminding you to pick up another ton of gravel. It needs to be seamless from home to truck to job site, helping you take advantage of opportunities as they arise. New SYNC 41 from Ford does this by bringing new levels of intelligence, conversational voice recognition and twice the computing power of SYNC 3 to help make navigation, music and connecting your vehicle to your smartphone faster and easier. It's like having an extra crew member in your truck.

LARGER SCREEN

A large, available 12" touchscreen has split-screen capability where you can see 2 features at the same time. SYNC 4 allows you to access everything from online reviews to parking availability in select cities from the driver's seat.

WIRELESS PHONE CONNECTION

FORD+ALEXA

SYNC 4 allows you to use Alexa² technology from inside the vehicle. So whether you want to play music, hear a joke or turn your house lights on as you pull in the driveway, the F-150 pickup lets you do it.

Payload Notes: Maximum capabilities shown are for properly equipped vehicles with required equipment and a 150-lb. driver. Weight of additional options, equipment, passengers and cargo must be deducted from this weight. For additional information, see your Ford Dealer. Towing Notes: Maximum loaded trailer weights shown. Do not exceed trailer weight of 5,000 lbs. when towing with bumper only. The combined weight of the towing vehicle (including options, hitch, passengers and cargo) and the loaded trailer must not exceed the GCWR (Gross Combination Weight Rating). Trailer tongue load weight should be 10-15% of total loaded trailer weight. Make sure that the vehicle payload (reduced by option weight) will accommodate trailer tongue load weight and the weight of passengers and cargo added to the towing vehicle. The addition of trailer tongue load weight, and the weight of passengers and cargo, cannot cause vehicle weights to exceed the rear GAWR (Gross Axle Weight Rating) or GVWR (Gross Vehicle Weight Rating). These ratings can be found on the vehicle's Safety Compliance Certification Label. See the RV and Trailer Towing Guide for requirements, restrictions and 5th-wheel towing.
